

My part of the community assessment was obtain begun in formation from the Pike County Health Department on health disparities, major risk factors, and major protective. The source of information was provided via the Pike County Community Health Needs Assessment and Community Health Improvement Plan 2024-2028.

The objective was to identify the health disparities that pose the greatest risk to pike countians (economy, substance abuse disorders, and lack of healthcare).

The goal was to identify the major protectives. The Pike County Health Department and local community partners utilized the results of the Community Health Assessment as a guide to establish priorities and develop strategic planning efforts to effectively improve the health of the community through the Community Health Improvement Plan.
